

Updating Software Entry

- This document provides detailed instructions how to update software entry in the BridgeArt.net software database.
- You will first need to register for an account. See <http://www.bridgeart.net/system/files/instructions/register.pdf> for instructions on how to register.
- Once you are a registered and approved user, you can update software entry in the database as explained on the following pages.

Log in.

The screenshot shows the BridgeArt.net website interface. At the top, there is a navigation menu with links for "Knowledge / Learning", "Software Database", "Partners", and "About / Services". Below these, there are links for "Login" and "Register". A red arrow points to the "Login" link. To the right of the navigation menu is a search bar with a "Search" button. The main content area features a large heading "Structural Software Database" and a list of statistics: "460+ Programs", "350+ Keywords", and "250+ Publishers". Below these are links to "browse by category", "browse by keyword", "browse by publisher", and "browse by program". On the right side, there is an "Advertising" section with a banner for "Bridge Tech 2011" and a list of related links. At the bottom left, there is another "Advertising" section with a banner that says "For the first time! Be among the largest gathering of".

Knowledge and Learning Resources for Structural Engineering

BridgeArt.net is [online database of software for architecture, engineering and construction](#) with the primary focus on software for structural analysis and design. It enables practicing engineers, educators, students, researchers, software developers and others to compare the 450+ available software tools and quickly locate the most suitable one for their need. The database has browse and search capabilities; detailed software and publisher information; glossary of relevant keywords, design codes and data formats; rich cross-referencing among programs, keywords, design codes, and data formats; it is interlinked with [Structural Wiki](#) that provides expanded coverage for each entry; and user-contributed ratings.
